

Ideation wall

Explore creativity without borders

- **Faster decision making by simultaneously showing multiple contents on a large video wall**
- **Efficient remote collaboration by connecting to the Unified Communication system and share the view**
- **Straightforward wired and wireless content sharing with flexible viewing layout**
- **Integrated touch panel to facilitate efficient collaboration and brainstorming sessions**
- **Easy to set up, use and maintain**
- **Safe investment: pre-tested, validated reference design that easily fits into existing meeting rooms**

A meeting room is a magically efficient place.

Where people discuss, think out loud, align, convince and brainstorm. A place with unlimited options for creativity vital to create real business value...

With the Barco Ideation Wall enterprises can easily facilitate this kind of interactive and collaborative meetings. The Ideation Wall consists of several building blocks, unique on their own, but when combined, they complement each other to a high-value, flexible and easy-to-install collaboration tool to support productive, seamless brainstorm and ideation sessions.

By simply combining a Barco UniSee LCD video wall, a Touch frame for Barco UniSee and a ClickShare CSE-800 device, a single, unified experience is created in the meeting room. This allows users to enjoy both the interactivity features of the wireless collaboration solution ClickShare CSE-800 and the seamless viewing experience of Barco UniSee, never seen on LCD video walls before.

The Barco Ideation Wall is a fully interoperable and pre-validated reference design. Three different use cases were defined to use the Ideation Wall according to your needs.

- Use the on board ClickShare CSE-800 software features for annotation and blackboarding;
- Use any application on your laptop combined with interactive touch capabilities via the touch back functionality with ClickShare CSE-800;
- Use specific ideation software on a separate desktop which is connected to the ClickShare CSE-800 using the HDMI input.

Key specifications

Barco UniSee – Revolutionized LCD video wall experience

- Best in class viewing experience - smallest seam – unmatched uniformity – auto calibration – high contrast – wide viewing angles
- Ready for all meeting rooms due to 800NIT high brightness and low reflection
- Lowest real estate with front access wall mount fitting meeting rooms
- Low noise level as fan-less
- Very long lifetime

ClickShare CSE-800 – Collaboration made easy

- Collaboration: 64 users can connect to the device and 8 users can share their screen across two 4k displays simultaneously
- Moderation: control and select what is being shared on the meetingroom display
- Touch back, Blackboarding & Annotation
- Efficiency: collaboration, integration and AV switching bundled into a single device for large meeting rooms
- Flexibility: share your content with all your devices (Android, PC, Mac and iOS) plus central device management
- 2x HDMI inputs
- Security: encryption, login management and three predefined security levels for enterprise rollouts
- Integration: REST API and dual network connections
