

DENON DCD-900NE

CD Player with Advanced AL32 Processing Plus and USB

Featuring Advanced AL32 Processing Plus and an integrated USB port, the Denon DCD-900NE CD Player reveals the highest quality audio signals from standard CD and USB sources supporting high-res playback.

HIGHLIGHTS	YOUR BENEFITS
Extended disc, format, and USB support	The DCD-900NE plays back CD, CD- R/RW, MP3, and WMA formats. Or plug in a USB stick to add playback of FLAC up to 192kHz/24bits or DSD 2.8 MHz/5.6 MHz.
Advanced AL32 Processing Plus	Utilizes data interpolation algorithms, up-sampling, and bit-extension for audio playback that is beautifully faithful to the original sound.
Designed to reduce vibration and interference	Built with specifically fitted power transformers and increased physical separation between the different audio and digital boards, reducing both vibration and interference.
Built to last	Backed by a more than 110-year legacy of designing premium audio components, the overall aesthetic, sound quality, and design integrity are built to last.
DAC Master Clock design	The precisely crafted master clock design includes a high-quality oscillator to suppress jitter, ensure optimal precision in D/A conversion, and optimizes digital audio circuitry.
Advanced circuitry with minimized signal paths	The circuit patterns have been engineered to shorten signal paths which reduces interference to reproduce sound that's clean and faithful to the original recording.
Pure Direct mode	Pure Direct mode turns the display and the digital outputs off to minimize interference that might color the audio signal.
Digital outputs	Features one optical and one coaxial digital output to connect to the digital input of an amplifier or AV receiver.
A heritage of audio technology leadership	Founded in 1910, Denon has a deep heritage of "firsts" in audio technology. This focused investment in audio R&D ensures you get the latest technology and highest quality with every listening experience.

Advanced AL32 Processing Plus

The latest in analog waveform reproduction technology, Advanced AL32 Processing Plus utilizes data interpolation algorithms, up-sampling, and bit-extension to support high-resolution audio. The resulting playback is highly detailed, free of interference, richly expressive in the lower range, and beautifully faithful to the original sound.

Hi-Res Audio Support

The ability to decode hi-res audio ALAC, FLAC and WAV lossless files up to 24-bit/192-kHz, as well as DSD 2.8MHz and 5.6MHz tracks (the audiophile format of SACD) lets you enjoy each note exactly as the artist intended.

DAC Master Clock Design

To accurately synchronize digital circuits, the DAC Master Clock design treats the DAC as the master when clock signals are supplied. Crafted with exceptional quality, the master clock is immediately adjacent to the DAC, which suppresses jitter and ensures optimal precision in D/A conversion.

Advanced Circuitry

The circuit patterns have been engineered to make signal paths as short as possible. Shorter circuits reduce interference to reproduce sound that's clean, highly transparent, and faithful to the original recording.

Pure Direct Mode

Pure Direct Mode turns the display and the digital outputs off to minimize interference that might color the audio signal. What you hear is clean, detailed, accurate sound.

Vibration-Resistant Design

Vibration-resistant design reduces the adverse audio effects of heavy components within hi-fi products so that sound quality meets Denon standards. Power transformers are fitted near the bottom and immediately above the insulators to prevent unwanted vibration. By lowering the transformer, the vibration surrounding the chassis is reduced, resulting in pristine sound.

110+ Years of First in Audio Technology

Founded in 1910, Denon has a deep heritage of "firsts" in audio technology—from Japan's first audio electronics manufacturer, to producing the world's first commercial CDs. This focused investment in audio R&D ensures you get the latest technology and highest quality with every listening experience.

Technical Information			
Specifications		Others	
Signal to Noise Ratio	115 dB (CD/USB)	Separated rectifier circuit for analog and digital circuitry	Yes
Frequency Response	USB (PCM/DSD): 2Hz - 50kHz (-3dB) CD: 2Hz - 20kHz	Display: Dimmer / Off	Yes / Yes
Total Harmonic Distortion	USB DSD: 0.0015% USB PCM 24-bit: 0.0020% CD: 0.0025%	Ports	
Line Level Output	2.2Vms	Headphone Out	No
DAC IC	ES9018K2M	Headphone Volume Control	No
Digital Filter	AL32 Processing Plus	Digital Optical In / Out	No / Yes
Dynamic Range	101 dB (CD)	Digital Coaxial In / Out	No / Yes
Features		Gold-plated Cinch	Yes
DAC Operation Mode: USB / Coax / Optical	Yes / No / No	Remote Control Bus In / Out	Yes
Advanced AL32 Plus	Yes	Analogue Out (Cinch)	2Ch
DAC Master Clock Design	ASRC in DAC	USB Audio (Front) / Made for iPod / Made for iPhone	Yes / No / No
Customized Components	Yes	General	
CD Compatibility: CD / CD-R/RW / WMA / MP3 / AAC	Yes	Metal Front Panel	Aluminum
Playback		Power Consumption	24W
Program Play (CD / SA-CD)	Yes / No	Standby Consumption	0.3W
Repeat	Yes	Auto Power Off	Yes
Random Play	Yes	Remote Control	-
USB-A File support	MP3 / WMA / AAC	Available colors: Premium Silver / Black	Yes / Yes
	WAV	Weight	4.9kg
	FLAC	Maximum Dimensions (W × D × H)	434 × 107 × 328mm
	ALAC		
	AIFF		
	DSD (DIFF / DSF)
