SR18S SUBWOOFER MAGNITUDE RESPONSE LEGEND & GRAPH

FLAT High Pass Mode – This factory default setting delivers nice, balanced bass, suitable for all music types.

DEEP High Pass Mode – SR Deep trades a bit of output for much deeper bass extension. This mode pairs well with electronic music, or for use with electronic keyboards.

PUNCH High Mode – SR Punch has opposite shaping of SR Deep. It delivers a higher peak SPL at the expense of LF extension, while still maintaining musicality. Optimized for use with live music.

NOTE

The Magnitude Response graph was generated using a Klippel NFS.
