Titan™ S E R I E S

Titan™ Series --- VERSATILE LIGHTWEIGHT PA SPEAKERS, DURABLE FOR INDOORS AND OUT

For many years the name 'Titan' has become the benchmark for portable and versatile loudspeakers. Titans are used day in, night out around the world in almost every audio environment imaginable. Available in active or passive, black or white, Titans deliver high quality audio with peace of mind reliability.

Designed to perform in portable and fixed installation applications alike Titans, with their ultra-lightweight composite enclosure, offer a range of mounting options including tripod floor stands, wall mounting brackets or even on their side as a floor monitor.

LAMINAR RIB
FLOW LIGHT
WEIGHT CABINET
CONSTRUCTION

MOISTURE
PROOF WOOFER

Titans use state of the art, gas assist injection moulding technology, plus an internal laminar flow rib pattern, increasing rigidity and reducing its weight compared with standard injection moulded enclosures.

Although the product weight and rubberised handles are perfect for the mobile musician, this technology also lends itself to installations where weight is an issue, not to mention that the polypropylene material and moisture proof woofers can withstand extreme outdoor conditions.

DESIGN

Titan loudspeakers are cosmetically designed for practical, real-world applications. On stage or for installation, comprehensive mounting points and optional hardware allows a Titan to be placed almost anywhere.

IRIS X driver technologies

The coil size and electrical sensitivity of a loudspeaker transducer is critical to its performance. Our new Titan X loudspeakers now include our proprietary IRIS X design which delivers Increased coil Radius and Increased electrical Sensitivity. The radius of the coil ensures smooth heat dissipation during prolonged high volume use, while the increased electrical sensitivity ensures that the transducer converts as much electrical power into sound output as the laws of physics allow.

A hot transducer wastes energy, risks damage and distorts. IRIS X reduces this through improved heat dissipation and improved efficiency.

In real-world terms, IRIS X transducers deliver higher SPL with less distortion. They lead the market with specifications and are designed and built entirely within Wharfedale Pro.

I Increased
R Radius
I Increased
S Sensitivity

Titan 12" and Titan 15" models use IRIS X HF drivers. With the largest voice coils and highest sensitivity in their class, it's these transducers which make a Titan truly unique.

IP54 Certified

IP54 certification assures that the product has

- Limited protection against dust ingress.
- Protection against splash water from any direction.

All Titan full-range models are IP54 Certified. A Titan is ideal for installations into hostile environments. Complete peace of mind - and protection.

Titan 8

Versatile and lightweight - Durable for indoors and out

The Titan 8 passive speaker combines the Titan technology, materials and design philosophy and includes a heavy-duty cast-frame woofer. This ensures absolute accuracy, high output and the smooth, wide dispersion of the critical mid and high frequency ranges.

Titan 8 is ultra-compact and lightweight so lends itself to a whole host of audio applications from gym installations, DJ booth monitors and public address.

Optional WPB-T8 mounting kit

- 150W RMS / 300W Program / 600W Peak
- 124dB Max SPL
- 70Hz – 20kHz frequency response
- Custom 8" Heavy duty moisture-proof LF driver
- Proprietary 90° x 60° Elliptical Wave Guide Horn design
- High-end Titanium HF Compression Driver
- Sophisticated Linkwitz-Riley 24dB/octave crossover design
- Tough, yet lightweight Polypropylene molded cabinet with rubber padded handles
- Multiple M6, M8 & M10 rigging points and integral tripod stand adapter
- Trapezoid shape for arrays as well as stage monitor applications
- Titan Tourbags available
- Both 1/4" and NL4 connectors provided
- Available in black, white or grey

Titan-X12 & X15

Our versatile passive Titans

The Titan-X12 and X15 feature all-new HF and LF drivers. The IRIS X HF compression driver has been completely reevaluated for both coverage and sound quality ensuring a much smoother sound, especially at high output.

The all-new LF driver has improved moisture rejection characteristics which allows Titan-X to be installed into hostile environments.

We have also tweaked the laminar rib cabinet structure to improve structural strength for durability and acoustic performance. Titan-X raises the bar for portable PA and is built to last.

- HF Drivers have been honed acoustically for HF frequency detail and power
- LF Drivers reject moisture for resistance in all environments
- Proprietary 100° x 80° Hybrid Symmetry Horn design
- Tough, yet lightweight Dynamic Polypropylene cabinet with rubber padded handles
- 10 x M8 rigging points and integral tripod stand adapter
- Rugged protective grille and top-stacking receptacles
- Trapezoid design for arrays as well as stage monitor applications
- Available in black or white

Titan-12Z & 15Z

The highest power handling Titans - EVER !

Do not be deceived by familiar looks. The Titan-Z's may appear cosmetically to be the same as our Titan-X - but, it is what is inside that matters.

Titan-12Z and 15Z feature extreme power handling transducers with high electrical sensitivity. This results in unimaginable power handling specifications and remarkable SPL. Custom built Wharfedale Pro drivers are what makes this possible.

The Titan-15Z features an enormous 4" LF voice coil for breath-taking power handling capabilities along with an enhanced compression driver with a 2" coil. Meanwhile the smaller Titan-12Z features a category leading 3" LF voice coil and our acclaimed IRIS X compression driver with its 1.75" voice coil.

- Extended-range, super sensitive Titanium dome HF drivers
- New 2" voice coil HF compression driver (15Z)
- Titan 12Z - 132dB Max SPL - 2000w peak
- Titan 15Z - 133.5dB Max SPL - 2800w peak
- Massive voice coils for improved heat dissipation and power handling
- Compatible with all Titan mounting hardware.

Titan-AX12 & AX15

Active

Using state of the art, bi-amplified technology coupled with the same rugged build of the Titan X Passive speakers, Titan AX12 and AX15 actives are ready for almost anywhere - band practice, on stage, in studios, at rehearsals, theaters, even houses of worship.

Bi-Amplified

Engineers have selected the perfect amplifier combination for the transducers and crossovers. The AX12 and AX15 each include 2 discrete amplifiers to ensure maximum efficiency and unparalleled audio quality.

Protection

Active models feature a comprehensive self protection system to ensure reliable operation right up to the power limit. Intelligent electronics constantly monitor for DC, overload, short circuit, thermals and LF/HF limiting giving you peace of mind and preventing internal damage.

Onboard mixing

The AX12 and AX15 active models feature handy mixing functions. Two inputs with separate level controls allow for overall balance and control. With easy interfacing to external mixers and processors its simple to connect to larger systems or to expand the system.

Flagship DSP

Titan AX12 and AX15 active loudspeakers now feature our cutting edge 6-position DSP engine. No other competitive model features such powerful and effective DSP.

This new DSP engine provides sophisticated internal loudspeaker management functions. These include limiting, compression, signal delay, dynamic boost, dynamic cut, crossover control and parametric EQ. Micro adjustments within each parameter ensure sonic clarity over the full frequency range.

We've optimised these DSP parameters to create 6 user-friendly settings including Monitor, Speech, Bass, Punch and an exclusive mode called "Live". This Live mode applies different DSP settings to each of the 2 inputs - perfect for solo entertainers using a mic and a line level source.

DSP SETTINGS	
1	EQ FLAT
2	MONITOR
3	SPEECH
4	BASS
5	PUNCH
6	LIVE

- New IRIS X4 HF Drivers have been honed acoustically for high-frequency detail and power
- New LF Drivers reject moisture for resistance in all environments
- New Proprietary 100° x 80° Hybrid Symmetry Horn design
- New category leading DSP functions
- New tweaked laminar rib structure
- Integral mixer functions
- AX12 – 300 watts programme / 600 watts peak
- AX15 – 420 watts programme / 840 watts peak
- Class D Bi-amplified
- Tough, yet lightweight Dynamic Polypropylene cabinet with rubber padded handles
- 10 x M8 rigging points and integral tripod stand adapter
- Rugged protective grille and top-stacking receptacles
- Trapezoid design for arrays as well as stage monitor applications
- Available in black or white
- Titan Tourbags available

T-Sub-AX15B

Everyone loves bass !

That is exactly why we have created the T-Sub-AX15B - our all-new new 700w Continuous, 1400w Peak 15" active subwoofer.

The internal Class D amplifier delivers huge output power into the custom quad-layer 15" Wharfedale Pro LF driver to produce extreme subs and low end pressure into any system.

Built for big bass, the plywood constructed cabinet is rock solid and is protected in durable Rhino Rock paint.

You'll not only 'feel' the T-Sub-AX15B, but you will also see it! A new illuminated WP logo badge subtly glows and adds to the overall on-stage "power" of the new T-Sub.

T-Sub-AX15B is the perfect companion for a Titan active.

Hold on to your socks!
T-Sub-AX15B is going to blow them off!

15"ACTIVE SUBWOOFER

- ✔ 700w Continuous (1400w peak)
- ✔ 3.0" voice coil - Quad layer driver
- ✔ Plywood construction
- ✔ Illuminated LED front logo badge
- ✔ Convection cooled Class D amplifier
- ✔ Adjustable low pass filter
- ✔ 35mm pole socket & durable side handles

Titan 8A MKII

Versatile, lightweight and powered.

The Titan 8A MKII active PA speaker combines the Titan technology, materials and design topology, including a titanium compression driver and heavy-duty cast-frame woofer, to ensure absolute accuracy, high output and the smooth, wide dispersion of the critical mid and high frequency ranges. Whilst being ultra-compact and light weight it lends itself to a whole host of audio applications from gym installations, DJ booth monitors and public address.

Indoor and outdoor installation

Although the product weight and rubberised handles are perfect for the mobile musician, this technology also lends itself to installations where weight is an issue, not to mention that the polypropylene material and moisture proof woofers can withstand outdoor conditions.

Additional protection can be found with the Titan Tourbags, custom made speaker bags with an unzippable front panel meaning your Wharfedale Pro loudspeaker is always protected.

Titan 8A MKII is available in Black or White.

IP54 Certified

IP54 certification assures that the product has

- Limited protection against dust ingress.
- Protection against splash water from any direction.

This makes the Titan 8a MKII ideal for installations into hostile environments. Complete peace of mind and protection.

Poles, mounts and brackets

On the base of the Titan Series is a convenient pole mount socket that is used for easy mounting on a standard 35mm diameter speaker poles. Cord wrap and cable anchor features are also moulded into the enclosure to keep things tidy.

Threaded rigging points are provided for a variety of safe flying configurations and Titan 8A MKII can be wall mounted using the optional WPB-T8.

- 180W RMS / 360W Peak
- 124dB Max SPL
- 70Hz – 20kHz frequency response
- Custom Heavy duty moisture-proof 8" LF driver
- Proprietary 90° x 60° Elliptical Wave Guide Horn design
- High-end Titanium HF Compression Driver
- 2-band Hi / Low shelf EQ
- Multiple M6, M8 & M10 rigging points and integral tripod stand adapter
- Rugged protective grille and top-stacking receptacles
- Trapezoid shape for arrays as well as stage monitor applications
- Tough, yet lightweight Polypropylene molded cabinet with rubber padded handles

Optional WPB-T8 mounting kit

Titan Sub-A12

Delivering low end punch in a portable package

The Titan Sub-A12 is powerful 12" reflex subwoofer designed to provide bass extension for Titan 8A MKII for an incredibly portable sound reinforcement setup. A built-in 250 watt (continuous), 500 watt (peak) amplifier conveniently accepts stereo or mono line level inputs via dual, balanced, XLR-1/4" combo connectors.

12" active reflex subwoofer

- Low-frequency power amplifier (class D) 250w rms, 500w peak
- Preset integral peak limiter prevents signal distortion and amplifier clipping
- Integral phase switch with 0° and 180° selections
- Adjustable crossover frequency: 80hz/100hz/120hz/150hz/180hz/200hz
- High pass frequency selection: 150hz
- Thermal, DC fault and short circuit protection
- XLR / 1/4" combo jack inputs
- Balanced line level output
- Integral pole mount adapter

Mounting hardware and options

12" and 15" models have a top stacking feature for multi-loudspeaker stacking applications and all Titan models can be used on their sides as stage monitors. Rubber-padded carry handles make the job of transporting the enclosure even easier.

On the base is a convenient pole mount socket that is used for easy mounting on a standard 35mm diameter speaker poles. Cord wrap and cable anchor features are also moulded into the enclosure. Threaded rigging points are provided for a variety of safe flying configurations with four of these inserts available, bottom-mounted.

More protection, same convenience

Wharfedale Pro Titan Tourbags add exceptional protection. The padded tourbags have been intelligently designed with removable front covers, rear panels, side panels and speaker pole sections so you can move and install your speaker without ever having to take the tourbags off. The front cover removes to show a unique mesh material, which adds additional protection and leaves the sound unfettered.

Choose Titan 8 tourbag for all Titan 8" models. Titan 12" tourbag for all Titan 12" models and Titan 15" tourbag for all 15" models.
